INSTRUCTIONAL SKILLS

COMMUNICATION FF I - 1

Relaying a Report of an Emergency

Subject: Fire Department Communications

NFPA 1001 4.2.1

REFERENCE

Initiate the response to a reported emergency, given the report of an emergency, fire department SOPs, and communications equipment, so that all necessary information is obtained, communications equipment is operated correctly, and the information is relayed promptly and accurately to the dispatch center. (4.2.1)

OBJECTIVE

Trainee shall initiate a response for a reported emergency by obtaining all necessary information and relaying the reported emergency information to the dispatch center using communication equipment.

INSTRUCTIONS - procedures for achieving the objective

Given a report of an emergency from the public, you will initiate a response by obtaining all necessary information and relaying this information to the dispatch center using the appropriate communication equipment. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

PREPARATION & EQUIPMENT

Simulated emergency situation
Communication equipment (radio, telephone, etc.)
Equipment for recording information (pencil and paper, dry erase board, etc.)
Department SOPs
PPE appropriate for the skill

Reprinted with permission from NFPA 1001-2019, *Standard for Firefighter Professional Qualifications* Copyright © 2018, National Fire Protection Association, Quincy, MA 02169. This reprinted material is not the complete and official position of the NFPA on the referenced subject, which is represented only by the standard in its entirety.

COMMUNICATION FF I - 2

Receiving a Business or Personal Telephone Call

Subject: Fire Department Communications

NFPA 1001 4.2.2

REFERENCE

Receive a telephone call, given a fire department phone, so that procedures for answering the phone are used and the caller's information is relayed. (4.2.2)

OBJECTIVE

Trainee shall verbally explain the procedures for receiving a business or personal telephone call on the fire department phone. Then Trainee shall demonstrate the procedure for receiving a telephone call.

INSTRUCTIONS - procedures for achieving the objective

Given a fire department business phone and equipment for recording information, you will verbally explain the procedures for receiving a business or personal telephone call on the fire department phone. Then you will demonstrate the procedures by receiving a simulated telephone call. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

PREPARATION & EQUIPMENT

Business or personal call (may be simulated)
Personnel to place the simulated call
Equipment used for recording this information as determined by the authority having jurisdiction, (examples: paper and pencil, dry erase board, etc.)

EXTINGUISHERS FF I - 1

Extinguishing a Class A Fire

Subject: Fireground Operations

NFPA 1001 4.3.16

REFERENCE

Extinguish incipient Class A, Class B, and Class C fires, given a selection of portable fire extinguishers, so that the correct extinguisher is chosen, the fire is completely extinguished, and correct extinguisher-handling techniques are followed. (4.3.16)

OBJECTIVE

Trainee shall extinguish an incipient Class A fire, so that the correct extinguisher is chosen, the fire is completely extinguished, and correct extinguisher- handling techniques are followed.

INSTRUCTIONS - procedures for achieving the objective

You shall demonstrate the operation of a fire extinguisher on a Class A fire. You are required to properly select an appropriate extinguisher, properly approach, extinguish, and withdraw after the fire is completely extinguished. Only one extinguisher may be used on each class of fire. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

PREPARATION & EQUIPMENT

Stored-pressure water extinguisher - 2½ gallons
Dry chemical extinguisher
Class A fuel
PPE appropriate for the skill

Reprinted with permission from NFPA 1001-2019, *Standard for Firefighter Professional Qualifications* Copyright © 2018, National Fire Protection Association, Quincy, MA 02169. FORCIBLE ENTRY FF I - 1

Force Entry into a Structure (Doors)

Subject: Fireground Operations

NFPA 1001 4.3.4

REFERENCE

Force entry into a structure, given personal protective equipment, tools, and an assignment, so that the tools are used as designed, the barrier is removed, and the openings is in a safe condition and ready for entry. (4.3.4)

OBJECTIVE

The firefighter trainee shall force entry into a structure through doors, so that the tools are used as designed, the barrier is removed, and the openings is in a safe condition and ready for entry.

INSTRUCTIONS: Procedures for achieving the objectives

Given a selection of forcible entry tools, you shall identify, select and safely carry the correct tool(s) appropriate for the type of door for which you will force entry. You shall then simulate the correct method of forcing entry into a structure through the door. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

PREPARATION & EQUIPMENT:

Pry bar
Halligan tool
Pick-head axe
Flat-head axe
Pike pole
Hydraulic extrication tool
K-tool
PPE appropriate for the skill

Reprinted with permission from NFPA 1001-2019, *Standard for Firefighter Professional Qualifications* Copyright © 2018, National Fire Protection Association, Quincy, MA 02169. FIRE STREAMS FF II - 1

Setting up and Operating a Foam Fire Stream

PERFORMANCE STANDARD

Subject: Fireground Operations

NFPA 1001 5.3.1

REFERENCE

Extinguish an ignitable liquid fire, operating as a member of a team, given an assignment, an attack line, personal protective equipment, a foam proportioning device, a nozzle, foam concentrates, and a water supply, so that the correct type of foam concentrate is selected for the given fuel and conditions, a properly proportioned foam stream is applied to the surface of the fuel to create and maintain a foam blanket, fire is extinguished, reignition is prevented, team protection is maintained with a foam stream, and the hazard is faced until retreat to safe haven is reached. (5.3.1)

OBJECTIVE

Trainee shall demonstrate setting up and operating a foam fire stream.

INSTRUCTIONS - procedures for achieving the objective

You shall demonstrate the proper procedure for setting up a foam fire stream with the appropriate equipment. You will demonstrate the operation of the foam stream. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

PREPARATION & EQUIPMENT

Foam concentrate
Foam eductor
Attack hose line
Nozzle
Pumper apparatus
PPE appropriate for the skill

FIRE STREAMS FF II - 2

Applying Foam

PERFORMANCE STANDARD

Subject: Fireground Operations

NFPA 1001 5.3.1

REFERENCE

Extinguish an ignitable liquid fire, operating as a member of a team, given an assignment, an attack line, personal protective equipment, a foam proportioning device, a nozzle, foam concentrates, and a water supply, so that the correct type of foam concentrate is selected for the given fuel and conditions, a properly proportioned foam stream is applied to the surface of the fuel to create and maintain a foam blanket, fire is extinguished, reignition is prevented, team protection is maintained with a foam stream, and the hazard is faced until retreat to safe haven is reached. (5.3.1)

OBJECTIVE

Given an ignitable liquid fire scenario, the firefighter trainee will select the appropriate foam concentrate for the fuel involved. The trainee shall demonstrate the proper application of a foam stream on the simulated fire for extinguishment.

INSTRUCTIONS - procedures for achieving the objective

Given an ignitable liquid fire scenario, you will select the appropriate foam concentrate for the fuel involved. You shall demonstrate the proper application of a foam stream on the **simulated** fire for extinguishment. The skill will commence on my instruction to start. The skill will end when all the identified steps have been accomplished and you state to me that you have completed the skill. Do you understand these instructions?

PREPARATION & EQUIPMENT

Foam concentrate (assorted concentrations)
Foam eductor
Attack hose line
Nozzle
Pumper apparatus
Simulated burning fuel area in or around walls or other obstructions
PPE appropriate for the skill

INSTRUCTIONAL SKILLS

FIRE STREAMS FF II - 2

Applying Foam

Trainee: _____

Department: _____

Given an ignitable liquid fire scenario, the firefighter trainee will select the appropriate foam concentrate for the fuel involved. The trainee shall demonstrate the proper application of a foam stream on the simulated fire for extinguishment. (5.3.1)

	POSSIBLE POINTS	TEST	RETEST
a. Ensures that the foam is compatible with the fuel burning	1		
b. Opens nozzle to ensure generation of foam	1		
c. Advances to a safe distance from the fire	1		
d. Applies agent on the fuel in an indirect method: 1. Bounces agent off walls or other obstructions 2. Applies the agent in front of the burning fuel and "rolls" the agent onto the fuel 3. In the absence of a wall or obstruction, gently lobs the agent onto the burning liquid	1		
e. Applies the agent in a sufficient rate and amount to extinguish the fuel	1		
f. Takes care not to approach too close to the burning fuel	1		
g. Takes care not to disturb the foam blanket or splash fuel with direct application of the foam stream	1

FIRE PROTECTION SYSTEMS FF I - 1

Locating the Main Control Valve

Subject: Fireground Operations

NFPA 1001 4.3.14

REFERENCE

Conserve property as a member of a team, given salvage tools and equipment and an assignment, so that the building and its contents are protected from further damage. (4.3.14)

OBJECTIVE

Trainee shall locate the Main Control Valve on a sprinkler system, correctly identify the position of the valve and demonstrate the procedures for fully opening and closing the valve.

INSTRUCTIONS - procedures for achieving the objective

You shall locate the Main Control Valve on a sprinkler system. You will then correctly identify and verbalize the position of the valve to the evaluator. You shall fully close the valve, then fully re-open the valve. After operating the valve, you shall verbalize special conditions for the valve when placing the system in service. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the above identified steps. Do you understand these instructions?

PREPARATION & EQUIPMENT

An indicating control valve for a sprinkler system
PPE appropriate for the skill

FIRE PROTECTION SYSTEMS FF I - 2

Controlling and Identifying Sprinkler Heads

Subject: Fireground Operations

NFPA 1001 4.3.14

REFERENCE

Conserve property as a member of a team, given salvage tools and equipment and an assignment, so that the building and its contents are protected from further damage. (4.3.14)

OBJECTIVE

Trainee shall stop the flow of water from a sprinkler head using a sprinkler stop or wedge. The trainee shall also identify the style of sprinkler head, temperature rating, and the conditions at which the control valve may be closed.

INSTRUCTIONS - procedures for achieving the objective

While wearing full protective clothing, you shall demonstrate the proper procedure for stopping the flow of water from a sprinkler head using a sprinkler stop or wedge. You shall identify and verbalize to the evaluator the style of sprinkler head, temperature rating, and the conditions at which the system control valve may be closed. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

INSTRUCTOR NOTE

A mock-up for the objective can be created by using a section of pipe with one sprinkler head connected and supplied by a garden hose.

PREPARATION & EQUIPMENT

Sprinkler system or mock-up
Open sprinkler head
Replacement sprinkler head
Wood wedges or commercially made stopper
PPE appropriate for the skill

INSTRUCTIONAL SKILLS

HOSE FF I - 1

Coupling and Uncoupling Fire Hose

Subject: Fireground Operations

NFPA 1001 4.3.10

REFERENCE

Attack an interior structure fire operating as a member of a team, given an attack line, ladders when needed, personal protective equipment, tools, and an assignment, so that team integrity is maintained, the attack line is deployed for advancement, ladders are correctly placed when used, access is gained into the fire area, effective water application practices are used, the fire is approached correctly, attack techniques facilitate suppression given the level of the fire, hidden fires are located and controlled, the correct body posture is maintained, hazards are recognized and managed, and the fire is brought under control. (4.3.10)

OBJECTIVE

Trainee shall demonstrate three methods for coupling and uncoupling fire service hose.

INSTRUCTIONS - procedures for achieving the objective

You shall demonstrate the proper method of coupling and uncoupling two lengths of fire hose using the following methods: (1) Knee-press, (2) Stiff arm, (3) Spanner wrench. You will have a second person for the stiff arm method. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

HOSE FF I - 5

Advance a Charged Attack Line Up a Ladder

Subject: Fireground Operations

NFPA 1001 4.3.10

REFERENCE

Attack an interior structure fire operating as a member of a team, given an attack line, ladders when needed, personal protective equipment, tools, and an assignment, so that team integrity is maintained, the attack line is deployed for advancement, ladders are correctly placed when used, access is gained into the fire area, effective water application practices are used, the fire is approached correctly, attack techniques facilitate suppression given the level of the fire, hidden fires are located and controlled, the correct body posture is maintained, hazards are recognized and managed, and the fire is brought under control. (4.3.10)

OBJECTIVE

Trainee shall advance a charged hoseline up a ladder.

INSTRUCTIONS - procedures for achieving the objective

Given a 24' extension ladder in place and working with another team member, you shall advance a charged 1½" attack line or larger up the ladder to a minimum height of 14' (or 2nd floor landing). You shall operate the nozzle from the ladder only after it is secured in place and you are secured on the ladder with a leg lock. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

SAFETY NOTE

Additional firefighters shall be utilized to heel the ladder and advance the hose, as necessary.

PREPARATION & EQUIPMENT

24' extension ladder
1½" or 2½" hose
1½" or 2½" nozzle
Rope or hose strap

INSTRUCTIONAL SKILLS

HOSE FF I - 6

Advancing Charged and Uncharged Attack Lines

Subject: Fireground Operations

NFPA 1001 4.3.10

REFERENCE

Attack a passenger vehicle fire operating as a member of a team, given personal protective equipment, attack line, and hand tools, so that hazards are avoided, leaking flammable liquids are identified and controlled, protection from flash fires is maintained, all vehicle compartments are overhauled, and the fire is extinguished. (4.3.7)

Extinguish fires in exterior Class A materials, given fires in stacked or piled and small unattached structures or storage containers that can be fought from the exterior, attack lines, hand tools and master stream devices, and an assignment, so that exposures are protected, the spread of fire is stopped, collapse hazards are avoided, water application is effective, the fire is extinguished, and signs of the origin area(s) and arson are preserved. (4.3.8)

Attack an interior structure fire operating as a member of a team, given an attack line, ladders when needed, personal protective equipment, tools, and an assignment, so that team integrity is maintained, the attack line is deployed for advancement, ladders are correctly placed when used, access is gained into the fire area, effective water application practices are used, the fire is approached correctly, attack techniques facilitate suppression given the level of the fire, hidden fires are located and controlled, the correct body posture is maintained, hazards are recognized and managed, and the fire is brought under control. (4.3.10)

OBJECTIVE

Trainee shall advance charged and uncharged hoselines on grade level and up and down stairs.

INSTRUCTIONS - procedures for achieving the objective

You shall demonstrate the proper method of advancing both charged and uncharged attack lines of two different sizes up an outside stairway to a second floor, then down an outside stairway to the lower floor. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

PREPARATION & EQUIPMENT

Pumper
3 sections of two different hose sizes, both 1½" or larger
Rope
Appropriate nozzle(s) for each hose line
PPE appropriate for the skill

Connecting Hose to a Standpipe

Subject: Fireground Operations

NFPA 1001 4.3.10

REFERENCE

Attack an interior structure fire operating as a member of a team, given an attack line, ladders when needed, personal protective equipment, tools, and an assignment, so that team integrity is maintained, the attack line is deployed for advancement, ladders are correctly placed when used, access is gained into the fire area, effective water application practices are used, the fire is approached correctly, attack techniques facilitate suppression given the level of the fire, hidden fires are located and controlled, the correct body posture is maintained, hazards are recognized and managed, and the fire is brought under control. (4.3.10)

OBJECTIVE

Trainee shall connect hose to a standpipe for fire attack.

INSTRUCTIONS - procedures for achieving the objective

While wearing full protective clothing and a SCBA, you shall demonstrate the proper method of carrying hose into a building, connecting it to a standpipe, and advancing the hose to its entire length. You shall complete the mandatory steps while performing this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

INSTRUCTOR NOTE

The instructor will designate the fire floor.

PREPARATION & EQUIPMENT

Appropriate hose adapters
100 feet of 1½" hose or larger
Standpipe connection or equivalent
Spanner wrenches
Nozzle
PPE appropriate for the skill

Inspecting for Damage, Cleaning and Maintenance of Hose, Couplings and Nozzles

Trainee: _____

Department: _____

Trainee shall demonstrate the procedures for cleaning, maintaining, and inspecting for damaged fire hose, couplings and nozzles. (4.5.2)

Nozzle	POSSIBLE POINTS	TEST	RETEST
a. Checks nozzle bale or handle for function by moving it to the "OPEN" and "CLOSED" positions	1		
b. Checks nozzle gasket for defects, age and ability to return to normal shape by pinching the gasket between the thumb and index fingers	1		
c. Checks nozzle for external damage	1		
d. Checks nozzle for internal damage and debris	1		
e. If applicable, ensures pistol grip is secure	1		
f. If applicable, ensures fog nozzle operates properly	1		
g. Performs skill in a safe and proficient manner, per AHJ	1		
TOTAL POINTS:	7		

Points needed to pass: 5

Fire hose	POSSIBLE POINTS	TEST	RETEST
a. Checks the expansion ring at both ends of the hose for burrs, looseness or damage	1		
b. Checks inner liner of hose, at both hose couplings, for signs of cracks, age, or defects and marks defective hose per department SOP	1		
c. Checks outer hose jacket for signs of damage (thermal, mold, mildew, or chemical)	1		
d. If hose is defective, marks according to department SOP	1		
e. Verbalizes how to operate hose washing and drying equipment and that hose should be testing annually	1		
f. Performs skill in a safe and proficient manner, per AHJ	1

Rolling Hose

Trainee: _____

Department: _____

Trainee shall demonstrate four methods of hose rolls. (4.5.2)

Donut Roll	POSSIBLE POINTS	TEST	RETEST
a. Lays hose flat in a straight line	1		
b. Starts roll from a point 5 or 6 feet off center toward the male coupling	1		
c. Rolls hose toward female end	1		
d. Leaves space at center loop for carrying	1		
e. Extends short length of hose at female end over the male end to protect threads	1		
f. Performs skill in a safe and proficient manner, per AHJ	1		
TOTAL POINTS:	6		

Points needed to pass: 4

Twin Donut Roll	POSSIBLE POINTS	TEST	RETEST
a. Lays hose flat in two parallel lines	1		
b. Starts roll by folding loop end	1		
c. Rolls both sections of hose simultaneously	1		
d. Inserts strap through center for carrying	1		
e. Performs skill in a safe and proficient manner, per AHJ	1		
TOTAL POINTS:	5		

Points needed to pass: 4

Straight Roll	POSSIBLE POINTS	TEST	RETEST
a. Lays hose flat in a straight line	1		
b. Begins roll by folding over male coupling	1		
c. Rolls hose to the female coupling	1		
d. Lays completed roll on its side	1		
e. Tamps down protruding hose	1		
f. Performs skill in a safe and proficient manner, per AHJ	1		
TOTAL POINTS:	6		

Points needed to pass: 4

Annual Hose Test

Trainee: _____

Department: _____

Trainee shall perform an annual hose test so that procedures are followed, the condition of the hose is evaluated, any damaged hose is removed from service, and the results are recorded. (5.5.5)			
	POSSIBLE POINTS	TEST	RETEST
a. Visually inspects gaskets before connecting hose	1		
b. Connects up to 300' of hose to be tested	1		
c. Connects female end of hose-to-hose test gate valve	1		
d. Connects male end of hose to nozzle (or other valve)	1		
e. Uses spanner wrench to tighten connections	1		
f. Secures hose as required by AHJ	1		
g. Fills hose with water by opening hose test gate valve	1		
h. Bleeds air from hose	1		
i. Ensures no water is leaking, tightens couplings if necessary	1		
j. Marks hose jacket at each coupling	1		
k. Closes hose test gate valve to restrict water flow through ¼" hole	1		
l. Increases pump pressure to required test pressure	1		
m. Monitors hose for leaks	1		
n. Maintains test pressure as required by AHJ	1		
o. Slowly reduces pressure	1		
p. Disengages pump	1		
q. Bleeds pressure and disconnects hoses	1		
r. Checks markings placed on hose near couplings	1		
s. Tags hose that failed test as required by AHJ	1		
t. Records hose test results as required by AHJ	1		
u. Performs skill in a safe and proficient manner, per AHJ	1

REFERENCE

Determine the need for command, organize and coordinate the Incident Management System until command is transferred, and function within an assigned role in the Incident Management System. (5.1.2)

Communicate the need for team assistance, given fire department communications equipment, SOPs, and a team, so that the supervisor is consistently informed of team needs, departmental SOPs are followed, and the assignment is accomplished safely. (5.2.2)

OBJECTIVE

Trainee shall determine the need for command, organize and coordinate the Incident Management System until command is transferred, and function within an assigned role in the Incident Management System while using communication equipment, as necessary.

INSTRUCTIONS - procedures for achieving the objective

Given a specific scenario, you will determine the need for command, organize and coordinate the Incident Management System until command is transferred, and function within an assigned role in the Incident Management System while using communication equipment, as necessary. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

INSTRUCTOR NOTE

Whenever possible, integrate the evaluation of this skill within a fire ground/emergency scenario. Here are some examples of scenarios you could use:

- **Scenario #1**: Building fire, two story masonry construction. 30 feet by 50 feet. 50% fire involvement on the first floor with fire extension to the second story. Need to call for a second alarm.
- **Scenario #2**: Large grass fire. Need to request mutual aid from a surrounding department.
- **Scenario #3**: On the scene of an injury accident. Need to request a set of "jaws" or request a second set.
- **Scenario #4**: On the scene of a long incident. Need to call for a canteen service, such as the Salvation Army or other group.
- **Scenario #5**: On the scene of a hazardous materials incident. Need to call for more personnel and specialized equipment.

INSTRUCTIONAL SKILLS

LADDERS FF I - 9

Two-Firefighter Low Shoulder Carry, Right Angle Flat Raise of a 24' Extension Ladder

Subject: Fireground Operations

NFPA 1001 4.3.6

REFERENCE

Set up ground ladders, given single and extension ladders, an assignment, and team members if needed, so that hazards are assessed, the ladder is stable, the angle is correct for climbing, extension ladders are extended to the necessary height with the fly locked, the top is placed against a reliable structural component, and the assignment is accomplished. (4.3.6)

OBJECTIVE

Trainee, operating as a member of a team, shall carry, position, and raise a 24' extension ladder using a low shoulder carry, right angle raise.

INSTRUCTIONS - procedures for achieving the objective

Using a two-firefighter low shoulder carry, you and a designated person will pick up and carry a 24' extension ladder 100' to a designated structure. You will raise the ladder to a two-story window or its equivalent. You will be positioned at the butt end of ladder for this evaluation. You shall verbalize the mandatory steps while performing this skill. When you have reached your destination, you and your team member will raise the ladder using the Right Angle Flat Raise. You will only communicate with the other team member to assure the ladder is properly carried, raised, and extended. You will begin on my instructions to start. The skill will end when you verbally state that the ladder is suitable for climbing. Do you understand these instructions?

PREPARATION & EQUIPMENT

24' extension ladder
Drill tower or equivalent
PPE appropriate for the skill

Carry, Hoist, and Secure a Roof Ladder

Subject: Fireground Operations

NFPA 1001 4.3.12

REFERENCE

Perform vertical ventilation on a structure as part of a team, given an assignment, personal protective equipment, ground and roof ladders, and tools, so that ladders are positioned for ventilation, a specified opening is created, all ventilation barriers are removed, structural integrity is not compromised, products of combustion are released from the structure, and the team retreats from the area when ventilation is accomplished. (4.3.12)

OBJECTIVE

Trainee shall carry, hoist, and secure a roof ladder onto a structure with a pitched roof.

INSTRUCTIONS - procedures for achieving the objective

Given an existing raised extension ladder, you shall carry, hoist, and secure a roof ladder onto a structure with a pitched roof. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

PREPARATION & EQUIPMENT

Three-Firefighter Flat Shoulder Carry, Right Angle Flat Raise of a 35' Extension Ladder

Subject: Fireground Operations

NFPA 1001 4.3.6

REFERENCE

Set up ground ladders, given single and extension ladders, an assignment, and team members if needed, so that hazards are assessed, the ladder is stable, the angle is correct for climbing, extension ladders are extended to the necessary height with the fly locked, the top is placed against a reliable structural component, and the assignment is accomplished. (4.3.6)

OBJECTIVE

Trainee, operating as a member of a team, shall carry, position, and raise a 35' extension ladder using a flat shoulder carry, right angle raise.

INSTRUCTIONS - procedures for achieving the objective

Using a three-firefighter flat shoulder carry, you and designated persons will pick up a 35' extension ladder and carry it 100' to a designated structure. Using a right-angle flat raise, you will raise the ladder to a three-story window or its equivalent. You will be required to verbalize key steps and complete the mandatory steps while performing this skill. You and your team members will raise the ladder without laying the ladder on the ground. You will be required to set the ladder with at least three rungs inside the third story window or its equivalent. You will be positioned at the butt end of the ladder for this evaluation. You will only communicate with the other team members to assure the ladder is properly carried, raised, and extended. The skill will start on my instructions to start. The skill will end when you state that the ladder is suitable for climbing. Do you understand these instructions?

INSTRUCTIONAL SKILLS

LIVE FIRE FF I - 1

Grade Level Structure Fire

Subject: Fireground Operations

NFPA 1001 4.3.10

REFERENCE

Attack an interior structure fire operating as a member of a team, given an attack line, ladders when needed, personal protective equipment, tools, and an assignment, so that team integrity is maintained, the attack line is deployed for advancement, ladders are correctly placed when used, access is gained into the fire area, effective water application practices are used, the fire is approached correctly, attack techniques facilitate suppression given the level of the fire, hidden fires are located and controlled, the correct body posture is maintained, hazards are recognized and managed, and the fire is brought under control. (4.3.10)

OBJECTIVE

Trainee, operating as a member of team, shall attack and suppress a grade level interior structure fire. The trainee shall also replace a burst section of hose.

INSTRUCTIONS - procedures for achieving the objective

Operating as a member of a team, you will demonstrate the proper technique for suppressing a grade level interior structure fire using the direct, indirect, or combination attack methods of extinguishment. You will use a 1½" or 1¾" charged attack hose line for this skill. I will indicate to you which section of hose to replace. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

INSTRUCTOR NOTE

A simulated section of burst hose will be replaced.

PREPARATION & EQUIPMENT

Enough 1½" or 1¾" charged attack lines for the scenario
Material for burning (must comply with NFPA 1403)
Multilevel burn facility
All needed support equipment and personnel for the scenario
PPE appropriate for the skill

INSTRUCTIONAL SKILLS

LIVE FIRE FF I - 2

Above Grade Level Structure Fire

Subject: Fireground Operations

NFPA 1001 4.3.10

REFERENCE

Attack an interior structure fire operating as a member of a team, given an attack line, ladders when needed, personal protective equipment, tools, and an assignment, so that team integrity is maintained, the attack line is deployed for advancement, ladders are correctly placed when used, access is gained into the fire area, effective water application practices are used, the fire is approached correctly, attack techniques facilitate suppression given the level of the fire, hidden fires are located and controlled, the correct body posture is maintained, hazards are recognized and managed, and the fire is brought under control. (4.3.10)

OBJECTIVE

Trainee, operating as a member of team, shall advance a hose line up a ladder, attack and suppress an above grade level interior structure fire.

INSTRUCTIONS - procedures for achieving the objective

Operating as a member of a team, you will demonstrate the proper technique for suppressing an above grade level interior structure fire using the direct, indirect, or combination attack methods of extinguishment. You will use a 1½" or 1¾" charged attack hose line for this skill. You must advance the hose line up a ladder for fire attack. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

INSTRUCTOR NOTE

The fire attack must be made after advancing a hose line up a ladder.

PREPARATION & EQUIPMENT

Enough 1½" or 1¾" charged attack lines for the scenario
Material for burning (must comply with NFPA 1403)
Multilevel burn facility
All needed support equipment and personnel for the scenario PPE appropriate for the skill

INSTRUCTIONAL SKILLS

LIVE FIRE FF I - 4

Storage Container Fire

Subject: Fireground Operations

NFPA 1001 4.3.8

REFERENCE

Extinguish fires in exterior Class A materials, given fires in stacked or piled and small unattached structures or storage containers that can be fought from the exterior, attack lines, hand tools and master stream devices, and an assignment, so that exposures are protected, the spread of fire is stopped, collapse hazards are avoided, water application is effective, the fire is extinguished, and signs of the origin area(s) and arson are preserved. (4.3.8)

OBJECTIVE

Trainee, operating as a member of team, shall extinguish a fire in a storage container.

INSTRUCTIONS - procedures for achieving the objective

Given the appropriate equipment and assistance, you shall demonstrate the proper technique for extinguishing a fire in a storage container. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

PREPARATION & EQUIPMENT

Pumper apparatus
Attack hoses and nozzles
Storage container (exterior dumpster or trash bin)
Material for burning (must comply with NFPA 1403)
All needed support equipment and personnel for the scenario
PPE appropriate for the skill

LIVE FIRE FF I - 6

Ground Cover Fire

Subject: Fireground Operations

NFPA 1001 4.3.19

REFERENCE

Combat a ground cover fire operating as a member of a team, given protective clothing, SCBA if needed, hose lines, extinguishers or hand tools, and an assignment, so that threats to property are reported, threats to personal safety are recognized, retreat is quickly accomplished when warranted, and the assignment is completed. (4.3.19)

OBJECTIVE

Trainee, operating as a member of a team, shall combat a ground cover fire.

INSTRUCTIONS - procedures for achieving the objective

Operating as a member of a team, you shall demonstrate and describe the proper techniques for combating a ground cover fire, so that threats to property are reported, threats to personal safety are recognized, retreat is quickly accomplished when warranted, and the assignment is completed. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

INSTRUCTOR NOTE

This is a simulation. The examinee is to demonstrate and describe proper *techniques.* It is NOT necessary to actually construct the fire line and it is NOT necessary to attack an actual fire.

PREPARATION & EQUIPMENT

Task appropriate protective clothing (according to the SOP of the authority having jurisdiction)
Hose lines
Extinguishers and/or hand tools
Assignments for combating a ground fire

INSTRUCTIONAL SKILLS

LIVE FIRE FF I - 7

Ignitable Liquid Fire

Subject: Fireground Operations

NFPA 1001 5.3.1

REFERENCE

Extinguish an ignitable liquid fire, operating as a member of a team, given an assignment, an attack line, personal protective equipment, a foam proportioning device, a nozzle, foam concentrates and a water supply, so that the correct type of foam concentrate is selected for the given fuel and conditions, a properly proportioned foam stream is applied to the surface of the fuel to create and maintain a foam blanket, fire is extinguished, re-ignition is prevented, team protection is maintained with a foam stream, and the hazard is faced until retreat to safe haven is reached. (5.3.1)

OBJECTIVE

Trainee, operating as a member of a team, shall extinguish an ignitable liquid fire.

INSTRUCTIONS - procedures for achieving the objective

Operating as a member of a team, you will demonstrate the proper technique for extinguishing an ignitable liquid fire. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

INSTRUCTOR NOTE

102-A.5.3.1 The Firefighter II should be able to accomplish this task with each type of foam concentrate used by the jurisdiction. This could include the use of both Class A and B foam concentrates on appropriate fires. When using Class B foams to attack flammable or combustible liquid fires, the Firefighter II should extinguish a fire of at least 100 ft^2 (9 m^2). The Firefighter II is not expected to calculate application rates and densities. The intent of this JPR can be met in training through the use of training foam concentrates or gas-fired training props.

PREPARATION & EQUIPMENT

Pumper apparatus with attack hose and nozzles for two lines
Firefighting foam and foam equipment
Ignitable liquid fire (must comply with NFPA 1403)
PPE appropriate for the skill

Reprinted with permission from NFPA 1001-2019, *Standard for Firefighter Professional Qualifications* Copyright © 2018, National Fire Protection Association, Quincy, MA 02169. INSTRUCTIONAL SKILLS

LIVE FIRE FF II - 1

Flammable Gas Cylinder Fire

Subject: Fireground Operations

NFPA 1001 5.3.3

REFERENCE

Control a flammable gas cylinder fire, operating as a member of a team, given an assignment, a cylinder outside of a structure, an attack line, personal protective equipment, and tools, so that crew integrity is maintained, contents are identified, safe havens are identified prior to advancing, open valves are closed, flames are not extinguished unless the leaking gas is eliminated, the cylinder is cooled, cylinder integrity is evaluated, hazardous conditions are recognized and acted upon, and the cylinder is faced during approach and retreat. (5.3.3)

OBJECTIVE

Trainee, operating as a member of a team, shall extinguish a flammable gas cylinder fire.

INSTRUCTIONS - procedures for achieving the objective

Operating as a member of a team, you will demonstrate the proper technique for extinguishing a simulated fire involving a flammable gas cylinder. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

EXAMINERS NOTE

This skill may be performed as a simulation.

102-A.5.3.3 Controlling flammable gas cylinder fires can be a very dangerous operation. The Firefighter II should act as a team member, under the direct supervision of an officer, during these operations.

PREPARATION & EQUIPMENT

Pumper apparatus
Attack hose and nozzles for two lines
Flammable gas cylinder (may be simulated)
PPE appropriate for the skill

INSTRUCTIONAL SKILLS

LIVE FIRE FF II - 2

Coordinate an Interior Attack

Subject: Fireground Operations

NFPA 1001 5.3.2

REFERENCE

Coordinate an interior attack line for team's accomplishment of an assignment in a structure fire, given attack lines, personnel, personal protective equipment, and tools, so that crew integrity is established; attack techniques are selected for the given level of the fire (for example, attic, grade level, upper levels or basement); attack techniques are communicated to the attack team; constant team coordination is maintained; fire growth and development is continuously evaluated; search, rescue, and ventilation requirements are communicated or managed; hazards are reported to the attack team; and incident command is apprised of changing conditions. (5.3.2)

OBJECTIVE

Trainee, operating as a member of a team, shall coordinate an attack on an interior structure fire.

INSTRUCTIONS - procedures for achieving the objective

Operating as a member of a team, you will demonstrate the proper technique for coordinating an interior attack on a structure fire. You shall communicate attack techniques, fire growth and development, search, rescue and ventilation requirements, and report hazards to incident command. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

INSTRUCTOR NOTE

(A.5.3.2) The firefighter II should be able to coordinate the actions of the interior attack line team at common residential fires and small business fires in the department's district. Complex or large interior fire management should be left to officers: however, this JPR will facilitate the development of the firefighter II towards effectively handling specific assignments within large fires.

PREPARATION & EQUIPMENT

Pumper apparatus
Attack hose and nozzles for two lines
Multiple story structure or burn facility suitable for interior fire attack
Material for burning (must comply with NFPA 1403)
All needed support equipment and personnel for the scenario
PPE appropriate for the skill

MAINTENANCE FF II - 1

Power Equipment Maintenance

Subject: Fire and Life Safety Initiatives, Preparedness, and Maintenance

NFPA 1001 5.5.4

REFERENCE

Maintain power plants, power tools, and lighting equipment, given tools and manufacturers' instructions, so that equipment is clean and maintained according to manufacturer and departmental guidelines, maintenance is recorded and equipment is placed in a ready state or reported otherwise. (5.5.4)

OBJECTIVE

Trainee shall maintain power plants, power tools, and lighting equipment.

INSTRUCTIONS - procedures for achieving the objective

Given a power plant, electrical cords, and lighting equipment, you will demonstrate and verbalize when the proper procedures are necessary for servicing and maintaining a power plant and lighting equipment. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

SAFETY NOTE

The instructor shall stop the firefighter trainee if any safety hazard exists.

OVERHAUL FF II - 1

Protecting Evidence of Fire Cause and Origin

Subject: Fireground Operations

NFPA 1001 5.3.4

REFERENCE

Protect evidence of fire cause and origin, given a flashlight and overhaul tools, so that the evidence is noted and protected from further disturbance until investigators can arrive on the scene. (5.3.4)

OBJECTIVE

Trainee shall protect evidence of fire cause and origin.

INSTRUCTIONS - procedures for achieving the objective

You will identify the area of origin of a fire, recognize possible causes and protect potential evidence. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

INSTRUCTOR NOTE

The examiner shall provide suitable evidence of area of origin.

NFPA 1001, A.5.3.4 - The Firefighter II should be able to recognize important evidence as to a fire's cause and maintain the evidence so that further testing can be done without contamination or chain-of-custody problems. Evidence should be left in place (when possible; otherwise, chain of custody must be established), not altered by improper handling, walking, and so forth, and not destroyed. Possible means to protect evidence is to avoid touching, protect with salvage covers during overhaul, or rope off the area where the evidence lies. The Firefighter II is not intended to be highly proficient at origin and cause determination.

PREPARATION & EQUIPMENT

Various overhaul tools
Flashlight
Evidence of fire origin
Equipment for noting and protecting evidence
PPE appropriate for the skill

Extricate a victim entrapped in a motor vehicle as part of a team, given stabilization and extrication tools, so that the vehicle is stabilized, the victim disentangled without further injury, and hazards are managed. (5.4.1)

OBJECTIVE

Trainee, operating as part of a team, shall manage the hazards found on a vehicle extrication scene.

INSTRUCTIONS - procedures for achieving the objective

Operating as a team, you will demonstrate the following technique for extricating a victim entrapped in a motor vehicle; managing vehicle extrication hazards. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

INSTRUCTOR NOTE

NFPA 1001 A.5.4.1 In the context of this standard, the term *extricate* refers to those activities required to allow emergency medical personnel access to the victim, stabilization of the vehicle, the displacement or removal of vehicle components obstructing victim removal, and the protection of the victim and response personnel from hazards associated with motor vehicle accidents and the use of hand and power tools on a motor vehicle.

PREPARATION & EQUIPMENT

Vehicle for extrication evolution
Hazards - battery, spilled fluid, leaks, etc. (may be simulated)
PPE appropriate for the skill

Assist Rescue Operations Teams

Subject: Rescue Operations

NFPA 1001 5.4.2

REFERENCE

Assist rescue operation teams, given standard operating procedures, necessary rescue equipment, and an assignment, so that procedures are followed, rescue items are recognized and retrieved in the time as prescribed by the AHJ, and the assignment is completed. (5.4.2)

OBJECTIVE

Trainee shall assist rescue operation teams by recognizing and retrieving rescue items.

INSTRUCTIONS - procedures for achieving the objective

You will assist a rescue operation team, following standard operating procedures (SOP), by retrieving necessary rescue equipment. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

INSTRUCTOR NOTE

NFPA 1001, A.5.4.2 – The Firefighter II is not expected to be proficient in technical rescue skills. The Firefighter II should be able to help technical rescue teams in their efforts to safely manage structural collapses, trench collapses, cave and tunnel emergencies, water and ice emergencies, elevator and escalator emergencies, energized electrical line emergencies, and industrial accidents.

PREPARATION & EQUIPMENT

Department rescue SOPs or recognized safety practices of the AHJ
Various rescue equipment used by AHJ
Scenarios based on equipment and SOPs used by AHJ
PPE appropriate for the skill

Rope Inspection and Maintenance

Subject: Preparedness and Maintenance

NFPA 1001 4.5.1

REFERENCE

Clean and check ladders, ventilation equipment, SCBA, ropes, salvage equipment, and hand tools, given cleaning tools, cleaning supplies, and an assignment, so that equipment is clean and maintained according to manufacturer's or departmental guidelines, maintenance is recorded, and equipment is placed in a ready state or reported otherwise. (4.5.1)

OBJECTIVE

Trainee shall inspect fire service rope, identify damage and describe the proper procedures for cleaning and storage.

INSTRUCTIONS - procedures for achieving the objective

You shall demonstrate the proper technique of inspecting fire service rope and verbalizing at least five (5) indicators of damage that are characteristic for the type of rope selected. You shall describe the proper cleaning and storage procedures of the selected rope. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

PREPARATION & EQUIPMENT

10-25 feet of rope (synthetic/natural)
PPE appropriate for the skill

Tying a Bowline Knot to Hoist a Smoke Ejector or Chain Saw

Subject: Fireground Operations

NFPA 1001 4.3.20

REFERENCE

Tie a knot appropriate for hoisting tool, given personnel protective equipment, tools, ropes, and assignment, so that the knots used are appropriate for hoisting tools securely and as directed. (4.3.20)

OBJECTIVE

Trainee shall tie a bowline knot with a safety on a smoke ejector and chain saw in preparation for hoisting. The trainee shall also describe five (5) potential elements of rope degradation and identify the working, standing, and running sections of the rope.

INSTRUCTIONS - procedures for achieving the objective

You will select the type and length of rope which will be adequate to meet this skill. You will verbalize five (5) potential elements of rope degradation. You shall demonstrate tying a bowline knot with safety on a smoke ejector or chain saw. I will primarily evaluate the finished product for accuracy by comparing the knot to reference materials. You will also verbally identify the working, standing, and running sections of the rope. The skill will begin on my instruction to start. The skill will end when you state you have completed all the steps. Do you understand these instructions?

PREPARATION & EQUIPMENT

Adequate length of rope (synthetic/natural)
Smoke ejector Chain saw
PPE appropriate for the skill.

INSTRUCTIONAL SKILLS

ROPES FF I - 5

Tying Clove Hitch to Hoist a Pike Pole or Axe

Subject: Fireground Operations

NFPA 1001 4.3.20

REFERENCE

Tie a knot appropriate for hoisting tool, given personnel protective equipment, tools, ropes, and assignment, so that the knots used are appropriate for hoisting tools securely and as directed. (4.3.20)

OBJECTIVE

Trainee shall tie a clove hitch and a half hitch on a pike pole and axe in preparation for hoisting. The trainee shall also describe five (5) potential elements of rope degradation and identify the working, standing, and running sections of the rope.

INSTRUCTIONS - procedures for achieving the objective

You will select the type and length of rope which will be adequate to meet this skill. You will verbalize five (5) potential elements of rope degradation. You shall demonstrate tying a clove hitch and half hitches on a pike pole or axe. I will primarily evaluate the finished product for accuracy by comparing the knot to reference materials. You will also verbally identify the working, standing, and running sections of the rope. The skill will begin on my instruction to start. The skill will end when you state that you have completed the skill. Do you understand these instructions?

PREPARATION & EQUIPMENT

Adequate length of rope (synthetic/natural)
Pike Pole
Axe
PPE appropriate for the skill

Tying Clove Hitch to Hoist a Pike Pole or Axe

Trainee: _____

Department: _____

Trainee shall tie a clove hitch and a half hitch on a pike pole and axe in preparation for hoisting. The trainee shall also describe five (5) potential elements of rope degradation and identify the working, standing, and running sections of the rope. (4.3.20)

Pike Pole	POSSIBLE POINTS	TEST	RETEST
a. Inspects rope for damage and *verbalizes at least 5 elements of rope degradation* (elements could include softness, crusty spots, stiffness, brittleness, nicks, cuts, dirt, mildew, heat sears or discoloration, fuzziness, mushy spots, sheath sliding, lumps and/or depressions.)	1		
b. Correctly measures rope for desired size	1		
c. Ties a clove hitch on the handle of the pike pole leaving enough excess running end to be used as a tagline	1		
d. Ties two more half hitches working towards the pike hook	1		
e. Verbally identifies the working, standing, and running sections	1		
f. Performs skill in a safe and proficient manner, per AHJ	1		
TOTAL POINTS:	6		

Points needed to pass: 4

Axe	POSSIBLE POINTS	TEST	RETEST
a. Inspects rope for damage and *verbalizes at least 5 elements of rope degradation* (elements could include softness, crusty spots, stiffness, brittleness, nicks, cuts, dirt, mildew, heat sears or discoloration, fuzziness, mushy spots, sheath sliding, lumps and/or depressions.)	1		
b. Correctly measures rope for desired size	1		
c. Ties a clove hitch on the handle of the axe near the axe head leaving enough excess running end to be used as a tagline	1		
d. Wraps the rope around the axe head and ties two half hitches working away from the axe head	1		
e. Verbally identifies the working, standing, and running sections	1		
f. Performs skill in a safe and proficient manner, per AHJ	1		
TOTAL POINTS:	6

SEARCH AND RESCUE FF I - 1

Rescue of a Firefighter with Functioning Respiratory Protection

Subject: Fireground Operations

NFPA 1001 4.3.9

REFERENCE

Conduct a search and rescue in a structure operating as a member of a team, given an assignment, obscured vision conditions, personal protective equipment, a flashlight, forcible entry tools, hose lines, and ladders when necessary, so that ladders are correctly placed when used, all assigned areas are searched, all victims are located and removed, team integrity is maintained, and team members' safety, including respiratory protection, is not compromised. (4.3.9)

OBJECTIVE

Trainee, with a team member, shall rescue a downed firefighter with functioning respiratory protection.

INSTRUCTIONS -- procedures for achieving the objective

You and a designated team member shall enter a perceived IDLH atmosphere and conduct search and rescue for a downed firefighter with functioning respiratory protection. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

PREPARATION & EQUIPMENT

Self-Contained Breathing Apparatus
PPE appropriate for the skill

SEARCH AND RESCUE FF I - 4

Removing Victims from Hazardous Environments

Subject: Fireground Operations

NFPA 1001 4.3.9

REFERENCE

Conduct a search and rescue in a structure operating as a member of a team, given an assignment, obscured vision conditions, personal protective equipment, a flashlight, forcible entry tools, hose lines, and ladders when necessary, so that ladders are correctly placed when used, all assigned areas are searched, all victims are located and removed, team integrity is maintained, and team members' safety, including respiratory protection, is not compromised. (4.3.9)

OBJECTIVE

Trainee shall demonstrate the techniques for removal of an injured person from a hazardous environment.

INSTRUCTIONS - procedures for achieving the objective

Given the proper equipment, and wearing full protective clothing, you shall demonstrate each of the carries, drags, and the use of a stretcher using approved procedures for removing an injured person from a hazardous atmosphere. You will begin on my instruction to start. Each skill will end when you have moved the victim 20 feet from the initial site, and you state to me that you have completed all the identified steps. For skills that require more than one-person, extra personnel will be provided. The extra team members cannot discuss or provide any information to the trainee. You will give all directions when the skills require more than one person. Do you understand these instructions?

PREPARATION & EQUIPMENT

Blanket
Bunker coat
Stretcher or backboard
Individual or rescue mannequin
SCBA, ladders, forcible entry tools, hose lines, flashlight PPE appropriate for the skill

Terminating Utility Service

Subject: Fireground Operations

NFPA 1001 4.3.18

REFERENCE

Turn off building utilities, given tools and an assignment, so that the assignment is safely completed. (4.3.18)

OBJECTIVE

Trainee shall safely turn off building utilities including water, electricity, natural gas and propane.

INSTRUCTIONS - procedures for achieving the objective

You will be given a choice of required tools. Utilizing these tools, demonstrate locating the proper shutoff locations and shut off the valves or control devices for gas, water, and electric service to a building. You will begin on my instruction to start. The skill will end when you state to me that you have completed all of the identified steps. Do you understand these instructions?

PREPARATION & EQUIPMENT

Building utility props
Water meter key
Gas meter key
Spanner wrench
Adjustable wrench
PPE appropriate for the skill

SAFETY FF I - 8

Operating an Air-Monitoring Instrument

Subject: Fireground Operations

NFPA 1001 4.3.21

REFERENCE

Operate an air-monitoring instrument, given an air monitor and an assignment or task, so that the device is operated and the firefighter recognizes the high- or low-level alarms of the air monitor and takes action to mitigate the hazard. (4.3.21)

OBJECTIVE

Trainee shall operate an air-monitoring instrument and recognize the high- or low- level alarms of the air monitor and take action to mitigate the hazard.

INSTRUCTIONS - procedures for achieving the objective

Given either single gas or multi-gas air monitoring instrument(s), you will demonstrate the procedures for placing the instrument(s) into service and verifying their calibration. You will also demonstrate how to use each air monitoring instrument provided. You will identify any high or low-level alarm that may activate and report their meaning and identify the appropriate mitigation actions that is required to the Skills Examiner. You will begin on my instructions to start. The skill will end when you state or indicate to me that you have completed all the identified steps. Do you understand these instructions?

1. Air monitoring instruments/equipment provided by the AHJ* that may include:
   a. Carbon monoxide monitor**
   b. Combustible gas indicator – Lower Explosive Limit (LEL Monitor) **
   c. Oxygen monitor**
   d. Gas specific monitor**
   e. Photoionization detector (PID)**
2. Other instruments/equipment provided by AHJ

*This skill may be performed with either actual air monitoring instruments/equipment or by the use of air monitoring training simulators.

**These may be single gas air monitoring instrument(s) or a component of a multi-gas air monitoring instrument/device.

Note: the two (2) most common air monitoring devices used in the fire service today are four (4) gas multi-gas monitors and five (5) gas multi-gas monitors that include a photoionization detector (PID) to measure volatile organic chemicals (VOC).

Salvage Cover Fold

Subject: Fireground Operations

NFPA 1001 4.3.14

REFERENCE

Conserve property as a member of a team, given salvage tools and equipment and an assignment, so that the building and its contents are protected from further damage. (4.3.14)

OBJECTIVE

Trainee, with a team member, shall fold a salvage cover to be used for the "one-firefighter spread" method.

INSTRUCTIONS - procedures for achieving the objective

Given a salvage cover that is fully opened on a flat surface, you and a designated partner shall demonstrate the proper method for folding a salvage cover to be used for the "one firefighter spread" method. You will begin on my instruction to start. The skill will end when you state to me that you have completed the identified steps. Do you understand these instructions?

PREPARATION & EQUIPMENT

INSTRUCTIONAL SKILLS

SCBA FF I - 4

Donning Breathing Apparatus Using the Coat Method

Subject: Fireground Operations

NFPA 1001 4.3.1

REFERENCE

Use self-contained breathing apparatus (SCBA) during emergency operations, given SCBA and other personal protective equipment, so that the SCBA is correctly donned, the SCBA is correctly worn, controlled breathing techniques are used, emergency procedures are enacted if the SCBA fails, all low-air warnings are recognized, respiratory protection is not intentionally compromised, and hazardous areas are exited prior to air depletion. (4.3.1)

OBJECTIVE

Trainee shall don an SCBA using the Coat Method.

INSTRUCTIONS - procedures for achieving the objective

With the Self-Contained Breathing Apparatus (SCBA) lying on the ground, back plate up, you shall don the breathing apparatus using the coat method. You shall verbalize the mandatory steps while performing this skill. You will begin on my instruction to start. The skill will stop when all identified steps have been accomplished and you put your hands in the air to signal that you are finished with this skill. Do you understand these instructions?

PREPARATION & EQUIPMENT

Self-Contained Breathing Apparatus
Personal Alert Safety System
PPE appropriate for the skill

INSTRUCTIONAL SKILLS

VENTILATION FF I - 3

Cleaning and Inspecting Ventilation Equipment

Subject: Preparedness and Maintenance

NFPA 1001 4.5.1

REFERENCE

Clean and check ladders, ventilation equipment, SCBA, ropes, salvage equipment, and hand tools, given cleaning tools, cleaning supplies, and an assignment, so that equipment is clean and maintained according to manufacturer's or departmental guidelines, maintenance is recorded, and equipment is placed in a ready state or reported otherwise. (4.5.1)

OBJECTIVE

Trainee shall inspect, clean and check ventilation equipment so that equipment is cleaned and maintained according to manufacturer's or departmental guidelines, maintenance is recorded, and equipment is placed in a ready state or reported otherwise.

INSTRUCTIONS: Procedures for achieving the objectives

Given a tool used for ventilation and the appropriate cleaning equipment, you will verbalize the proper technique for inspecting and cleaning the ventilation tool. Actual cleaning does not need to occur for this skill. You will begin on my instruction to start. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

INSTRUCTIONAL SKILLS

WATER SOURCE FF I - 1

Supply Hose to Hydrant

Subject: Fireground Operations

NFPA 1001 4.3.15

REFERENCE

Connect a fire department pumper to a water supply as a member of a team, given supply or intake hose, hose tools, and a fire hydrant or static water source, so that connections are tight and water flow is unobstructed. (4.3.15)

OBJECTIVE

Trainee, operating as a team member, shall connect a pumper apparatus to a fire hydrant using a forward lay and a reverse lay.

INSTRUCTIONS - procedures for achieving the objective

You shall demonstrate the proper technique for connecting a 2½ inch or larger soft supply hose to a hydrant. Once the hose has been connected to the hydrant and the intake of the apparatus, you will then fully open and close the hydrant. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

Supply Hose to Hydrant

Trainee: _____

Department: _____

Trainee, operating as a team member, shall connect a pumper apparatus to a fire hydrant using a forward lay and a reverse lay. (4.5.15)

FORWARD LAY	POSSIBLE POINTS	TEST	RETEST
a. Obtains a hydrant wrench from apparatus	1		
b. Removes sufficient hose to reach the hydrant	1		
c. Secures the hose per AHJ	1		
d. Signals driver to proceed to the fire	1		
e. Flushes hydrant	1		
f. Connects hose to the hydrant	1		
g. Connects other hose coupling to pump intake	1		
h. Fully opens hydrant	1		
i. Removes all kinks from the hose	1		
j. Fully closes hydrant when water source is no longer needed	1		
k. Performs skill in a safe and proficient manner, per AHJ	1		
TOTAL POINTS:	11		

Points needed to pass: 8

REVERSE LAY	POSSIBLE POINTS	TEST	RETEST
a. Removes sufficient hose and tools at the fire scene	1		
b. Secures the hose per AHJ	1		
c. Signals driver to proceed to the hydrant	1		
d. Flushes hydrant	1		
e. Makes appropriate hydrant connection	1		
f. Connects other hose coupling to pump intake or appliance at fire scene	1		
g. Fully opens hydrant	1		
h. Removes all kinks from the hose	1		
i. Fully closes hydrant when water source is no longer needed	1		
j. Performs skill in a safe and proficient manner, per AHJ	1

Hand Laying Supply Line

Subject: Fireground Operations

NFPA 1001 4.3.15

REFERENCE

Connect a fire department pumper to a water supply as a member of a team, given supply or intake hose, hose tools, and a fire hydrant or static water source, so that connections are tight and water flow is unobstructed. (4.3.15)

OBJECTIVE

Trainee, operating as a team member, shall hand lay hose to connect a pumper apparatus to a water source.

INSTRUCTIONS - procedures for achieving the objective

Given the proper equipment as a member of a team, you shall demonstrate the shoulder carry method of hand laying a given size and length of supply line from a pumper to a water source. You will be evaluated on your individual performance. You will begin on my instruction to start. The skill will end when the final performing team member states to me that all the identified steps have been completed. Do you understand these instructions?

PREPARATION & EQUIPMENT

Pumper
Sufficient amount of supply hose
Water source
Necessary adapters and tools
PPE appropriate for the skill

Trainee, operating as a team member, shall hand lay hose to connect a pumper apparatus to a water source. (4.3.15)

Firefighter #1 – Deploys Hose	POSSIBLE POINTS	TEST	RETEST
a. Positions on the rear step of the apparatus	1		
b. Deploys supply hose on to firefighters	1		
c. Uncouples the hose from hose bed	1		
d. Makes hose connection to pumper	1		
e. Performs skill in a safe and proficien7t manner, per AHJ	1		
TOTAL POINTS:	5		

Points needed to pass: 4

Firefighter #2 – Shoulder Carry	POSSIBLE POINTS	TEST	RETEST
a. Positions at the tailboard facing the direction of travel	1		
b. Brings the hose from behind back onto shoulder so the hose folds at knee level	1		
c. Continues to make knee-high folds until the appropriate amount of hose is loaded	1		
d. Holds the hose to prevent it from slipping off the shoulder	1		
e. Moves forward approximately 15 feet (5 meters)	1		
f. Advances the hose with firefighter #3 toward the water source while flaking hose off the shoulder	1		
g. Uses adapters and tools to connect hose to the water supply	1		
h. Performs skill in a safe and proficient manner, per AHJ	1

Establishing a Portable Water Source Connection

Subject: Fireground Operations

NFPA 1001 4.3.15

REFERENCE

Connect a fire department pumper to a water supply as a member of a team, given supply or intake hose, hose tools, and a fire hydrant or static water source, so that connections are tight and water flow is unobstructed. (4.3.15)

OBJECTIVE

Trainee, operating as a team member, shall establish a portable water source connection.

INSTRUCTIONS - procedures for achieving the objective

Given all the necessary equipment, you shall demonstrate the proper technique for connecting a pumper to a portable water supply source. It will not be necessary for you to actually draft water as a part of this skill. The skill will end when you state to me that you have completed all the identified steps. Do you understand these instructions?

PREPARATION & EQUIPMENT

Pumper apparatus
2 - 2½" or larger hard supply hoses with strainers
Rubber mallet
Portable water tank
PPE appropriate for the skill
